Tags:

Time Allocated: 1-6 lessons

Links to National Curriculum:

ACPPS073 (Yr 7–8), ACPPS076 (Yr 7–8), ACPPS095 (Yr 9–10), ACPPS096 (Yr 9–10)

Origin: International

Cost:

Free

Developers

University of Utah, Genetic Science Learning Center, USA.

Available

Summary

Players take a look inside the brains of mice that are under the influence of different drugs. The chemical interactions at the synaptic level are explored.

Format

20-minute interactive learning experience.

NOTE: This game requires Flash. If you are using an IOS device, please note these devices do not support Flash. We recommend playing this game on Internet Explorer.

Expected Benefits

- Increased general knowledge of drug(s)
- Increased knowledge of drug-related effects and harms.

Evidence Base

The game has been reviewed and won the *Science* 2010 prize for online resources in education. See:

Stark, L. A., & Pompei, K. (2010). Making genetics easy to understand. *Science*, 327, 538-539. doi: 10.1126/science.1183029
